

# E/One T260

# **Duplex Alternating Alarm Panel**

## **Description**

The T260 Duplex Alternating Alarm panel is custom designed for use with Environment One duplex grinder pump stations.

Duplex grinder pump stations, a station with two grinder pumps, require the pumping load to be shared equally between the two pumps. Under normal conditions, one pump removes the accumulated sewage from the grinder pump basin. After 24 hours, the T260 Alternating Panel toggles the electrical supply power to the pump that was idle. If the sewage level reaches the alarm level, the two grinder pumps will operate simultaneously for 3 to 4 minutes. If, after that time, the sewage is not below the alarm level, the alarm circuit is engaged.

The T260 Alternating Panel is supplied with audible and visual high water level alarms. The panel is easily installed in accordance with relevant national and local codes.

The T260 Panel is listed by Underwriters Laboratories, CSA, CE and NSF to ensure high quality and safety.

### **Standard Features**

UL-approved, corrosion-proof enclosure

NEMA 4X-rated enclosure with hinged access panel

Lockable latch with keyed-alike padlock included

Circuit breakers

Terminal blocks & ground lugs

Dry contacts

Lead/lag, run and alarm indicator lights

Manual push-to-run

#### **Optional Features**

Hour meters

E/One Remote Sentry ready (with power loss high level alarm capability)

Dead front

Generator receptacle with auto transfer

GFCI receptacle

Auto dialer
